MANAGEMENT INFORMATION SECTION

89-03409/

FOREWORD

The population data shown in this report are for Manitoba Health regions for 1988 and are based on Manitoba Healh Services Commission records.

Data for the regions include population of cities, towns, villages, rural municipalities, local government districts, and unorganized territories. It should be noted that villages and towns are separately identified if these are incorporated. If unincorporated, their population counts are included in the rural municipality in which these are located.

Population for small areas, say a rural town, can be biased because the mailing address may be reported as the place of residence. An individual residing outside the town but having his mailing address there may be counted as living within the town. This bias in the population figures is reduced as the catchment area increases. Thus, regional estimates are not significantly affected by the misclassification bias.

The type of place indicates Indian Band, unorganized territory, and municipal status of incorporated places (city, town, village, rural municipality, and local government district). The following list indicates the abbreviations used for type of places:

LGD	Local Government District - a designated area having no local government; administered by the province through a resident administrator.
RM	Rural Municipality
UT	Unorganized Territory - an area with no local government or resident administrator.
